

Born from the merger of Matikem and UP-tex, EuraMaterials is the North-European cluster that acts as a cornerstone in the new processing material industries.

Since innovation has its origin more and more in multi cross-expertise and the diversity of materials, EuraMaterials eases networking, meetings and exchanges between stakeholders in the fields of textile, paper/cardboard, plastics, glass, composites, ceramics, wood, metal...

Keep updated with latest news:

EuraMaterials website is shortly opening!
